Description

The CM800i is an 8-inch, two-way, blind-mount, in-ceiling speaker design that delivers extended low-end response (71 Hz) and optimal off-axis performance (up to 10 kHz, EASE[™] documented). SoundTube's proprietary BroadBeam[®] waveguide tweeter system delivers consistent high-performance audio across the operating bandwidth. The CM800i speaker design incorporates a low-profile grille, proprietary M8[™] motor-board and six-position tap switch with voice coil direct position. Mounting hardware is included and features a fast and secure constant-tension, fixed-wing mounting system.

¹ Impedance listed per IEC 60268-5 with a minimum less than 80% the nominal impedance

² 1 W 1 m sensitivity determined using nominal impedance

³ Frequency response measured in half or full space as dictated by speaker mounting configuration

⁴ Max program power is 3 dB above max continuous power

⁵ Continuous power rating, EIA-426-B test

⁶ Max output based on max continuous power

Applications

Designed for in-ceiling background to foreground SPL applications, the CM800i delivers a broad dispersion pattern (1 kHz – 10 kHz, EASE™ documented), true low-end response (71 Hz, -10 dB) and high sensitivity (90 dB 1 W / 1 m). The CM800i is ideal for nightclubs, bars, fitness centers, hotel, airports, convention centers, casinos, corporate venues, churches and other in-ceiling applications requiring background to foreground SPL. For applications where additional bass is required, SoundTube's CM1001d-T 10-inch subwoofer provides low-end response down to 43 Hz.

BroadBeam® Wide Dispersion Technology

More than three years in development, SoundTube's proprietary BroadBeam® technology incorporates a high-frequency waveguide mated to a 1-inch convex aluminum tweeter. The BroadBeam® high-frequency waveguide delivers a consistent dispersion pattern across the upper registers of the frequency spectrum (up to 10 kHz, EASE™ documented). The result is an audio system with better edge-to-edge coverage, reduced power needs, shorter installation time and cost savings on shipping and labor.

Patented SoundTube Technologies

SoundTube Entertainment and the MSE Audio Group constantly develop new technologies which enhance audio product performance. SoundTube Entertainment innovations are protected by multiple U.S. and international patents, which explicitly cover SoundTube dome, enclosure and dispersion technologies. The MSE Audio Group actively defends its patents in order to protect SoundTube resellers and end-users.
